Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Project Overview

Project Name: Implement Client Script & UI Policy (Incident)

Project Description: Enforces data integrity on ServiceNow Incident records using UI Policies and Client Scripts - mandatory fields, auto-populated values, field behaviour, and blocking submission when conditions are not met.

Project Version: _____

Testing Period: _____ to _____

Testing Scope

- UI Policy and UI Policy Actions on the Incident form (mandatory, visible, read-only)
- Client Scripts (onLoad, onChange, onSubmit) using g_form for validation and auto-population
- Form validation and blocking of submission when conditions are not met

Testing Environment

URL/Location: ServiceNow instance - _____

Credentials (if required): _____

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Mandatory field enforced (positive/negative)	1. Open new Incident 2. Leave Short description empty 3. Click Submit	Field marked mandatory; save blocked with message		
TC-002	Auto-populate on field change	1. Open new Incident 2. Set Impact and Urgency	Related field (e.g. Priority) populates as configured		
TC-003	Conditional field behaviour	1. Open an Incident 2. Change State to Resolved	Resolution fields become visible and mandatory		

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-004	Read-only field rule	1. Open a Closed Incident 2. Try editing a locked field	Field is read-only and cannot be edited		
TC-005	onSubmit client script blocks invalid data	1. Enter data that breaks the rule 2. Click Submit	Alert shown and submission aborted		
TC-006	Valid submission succeeds	1. Fill all required fields correctly 2. Click Submit	Incident record created successfully		

Bug Tracking

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
